

control means mounted in the enclosure and operatively connected to said manually actuable keypad for receiving selected input data entered manually on the keypad corresponding to desired programming selections at the remote location,

means for storing financial information of the user, and transmitter means operatively connected to said control means for

a) transmitting desired programming selections to an interactive receiver unit at a remote location corresponding to a selected keypad sequence so as to choose a desired programming and interact therewith through the manually actuable keypad, and

b) transmitting the financial information of the user to the receiver unit at the remote location and including switch means for switching between keypad selection of normal television channels and keypad selection of desired programming selections.

11

10. (Once Amended) A remote control device for use with a transactional processing system having a receiver unit that receives identical transaction information sets broadcast in subchannels from a programming transmitter and then selects, stores and displays a desired information set, comprising:

a housing,

a manually actuable keypad positioned on an outer surface of the housing,
control means contained within the housing and operatively connected to said
manually actuable keypad for receiving data entered manually on the keypad
corresponding to desired programming selections in the receiver unit that receives
identical transaction information sets,

means for storing financial information of the user, [and including] means
mounted by the housing for inputting said financial information to the financial storing
[storage] means,

transmitter means operatively connected to said control means for

a) transmitting desired programming selections to a receiver unit
corresponding to the selected keypad sequence so as to choose a desired programming
and interact with the receiver unit through the manually actuable keypad, and

b) transmitting any financial information of the user to the receiver unit to
authorize a desired transaction in real time,

phone circuitry including speaker and microphone means, and phone receiver
[unit] and phone transmitter means for transmitting and receiving phone signals to and
from said receiver unit, and

switch means for actuating said remote control device between 1) a phone
wherein said phone circuitry is activated, and 2) a device for selectively interacting
with said receiver unit to choose desired programming and authorize transactions.

Please amend the following claims as indicated:

In claim 6, line 2, please delete the word "inputting" and insert the word --storing--.

In claim 8, line 2, please delete the word "querty" and substitute --qwerty--.

In claim 13, line 1, please change the numeral "10" to the numeral --12--.

In claim 16, line 2, please delete the word "querty" and substitute --qwerty--.

In claim 17, line 2, please add in the word --another-- "after including".

In claim 19, line 7, please add --:-- after the word "comprising" and in line 18, please delete the word "storage" and substitute the word --storing--.

In claim 20, line 13, please add --:-- after the word "comprising".

In claim 23, line 1, please delete the numeral "20" and substitute --22--.

In claim 24, line 2, please delete both instances of the forward "storage" and substitute the word --storing-- for each deletion.

In claim 26, line 2, please delete the word "querty" and substitute the word --qwerty--.

PATENT

Docket No. 1029-4012US3

Express Mail Label No. EI086261629US

In claim 27, line 6, please delete the word "data" and substitute

--number--.

In claim 34, line 2, please delete the word "storage" and substitute

--storing--.

In claim 36, line 2, please delete the word "querty" and substitute the word --qwerty--.

In claim 37, line 4, please insert the letter --a-- before the word "phone"; and in line 7, please delete the word "unit" and substitute --device--.

In claim 44, lines 1-2, please delete the phrase "wherein said transaction processor after authorizing payments, transmits" and substitute --further comprising means for transmitting--.

REMARKS

Applicant has amended the specification and claims herein to conform with the amendments made in parent application Serial No. 08/444,202. Applicant has also submitted herewith corrected informal drawings Figures 3, 5, 10 and 12 which were submitted to the Official Draftsperson in the parent application.
